Welcome to our project aimed at developing a sophisticated Tourism Management System using Java. Our system is meticulously crafted to cater to the diverse needs of travelers and tourism businesses, featuring three distinct views: User, Agent, and Admin.

User View: Picture yourself as a traveler eager to explore new destinations. With our User View, you can effortlessly browse and book accommodations, transportation, and tours with just a few clicks. Experience the convenience of personalized travel arrangements and instant confirmations, all at your fingertips.

Agent View: Behind the scenes, our Agents stand ready to assist travelers like you in crafting memorable journeys. Equipped with advanced tools and insights, Agents can seamlessly manage bookings, provide tailored recommendations, and offer personalized support to ensure your travel experience exceeds expectations.

Admin View: At the helm of our system are our Administrators, entrusted with overseeing its smooth operation. From managing inventory and user accounts to generating insightful reports and analyzing data trends, Admins play a pivotal role in shaping the success of our Tourism Management System.

Output:

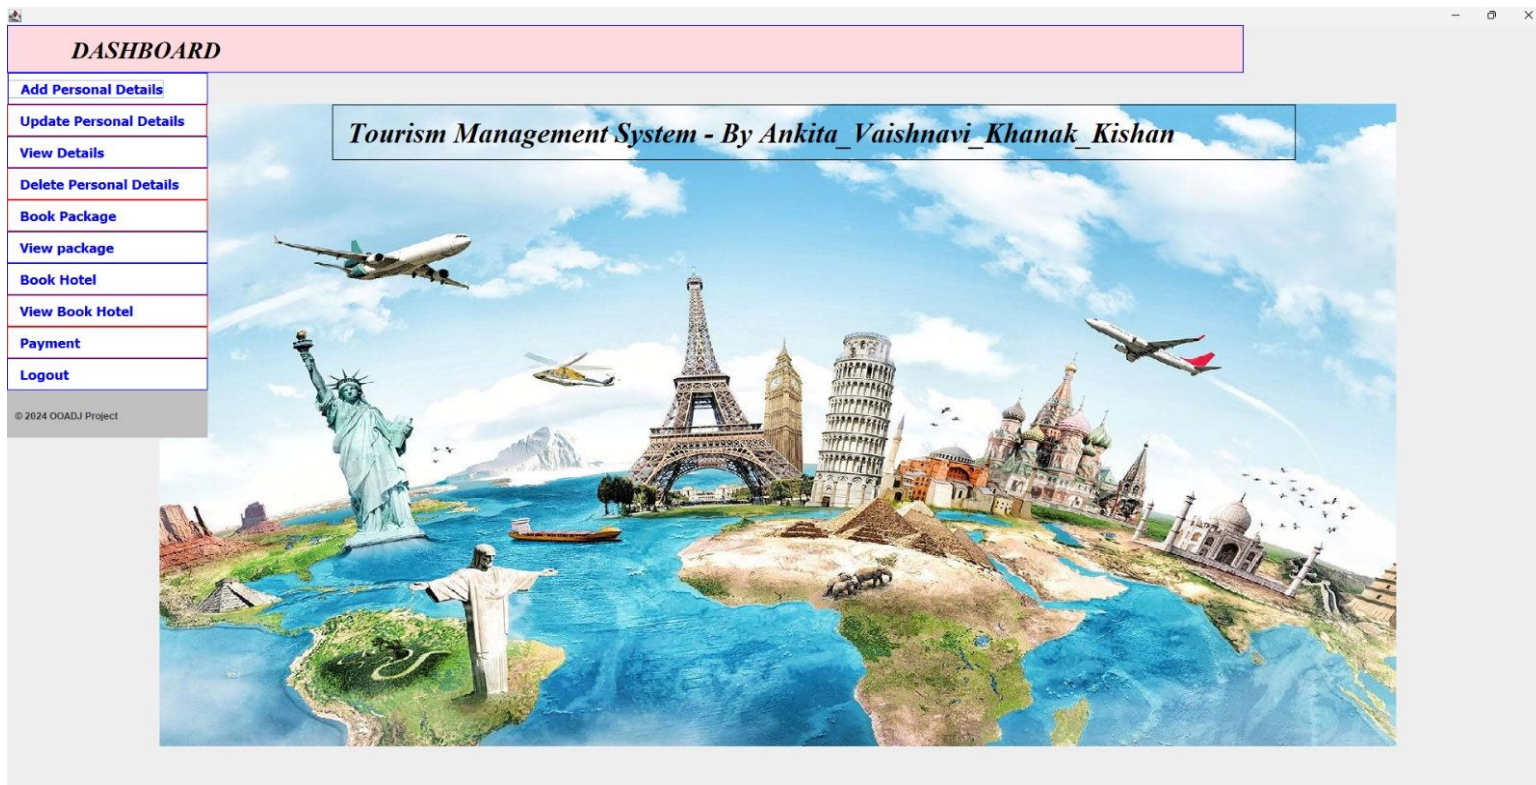

1. Login Page

The screenshot shows a web browser window titled "Login Form...". On the left is a large placeholder for a user profile picture, showing a black silhouette of a person in a suit. On the right is the login form with the following elements:

- Username:** A text input field containing the text "khanak".
- Password:** A password input field with masked characters "....".
- LogIn:** A red button with white text.
- SinUp:** A white button with a black border and red text.
- Forget Passwo...:** A white button with a black border and red text.
- Are_You_Troubling_in_Login:** A red italicized text label at the bottom.

2. Dashboard Page

The screenshot shows a web browser window displaying a dashboard for a "Tourism Management System".

Dashboard Header: A pink bar with the text "DASHBOARD".

Left Sidebar: A vertical menu with the following items:

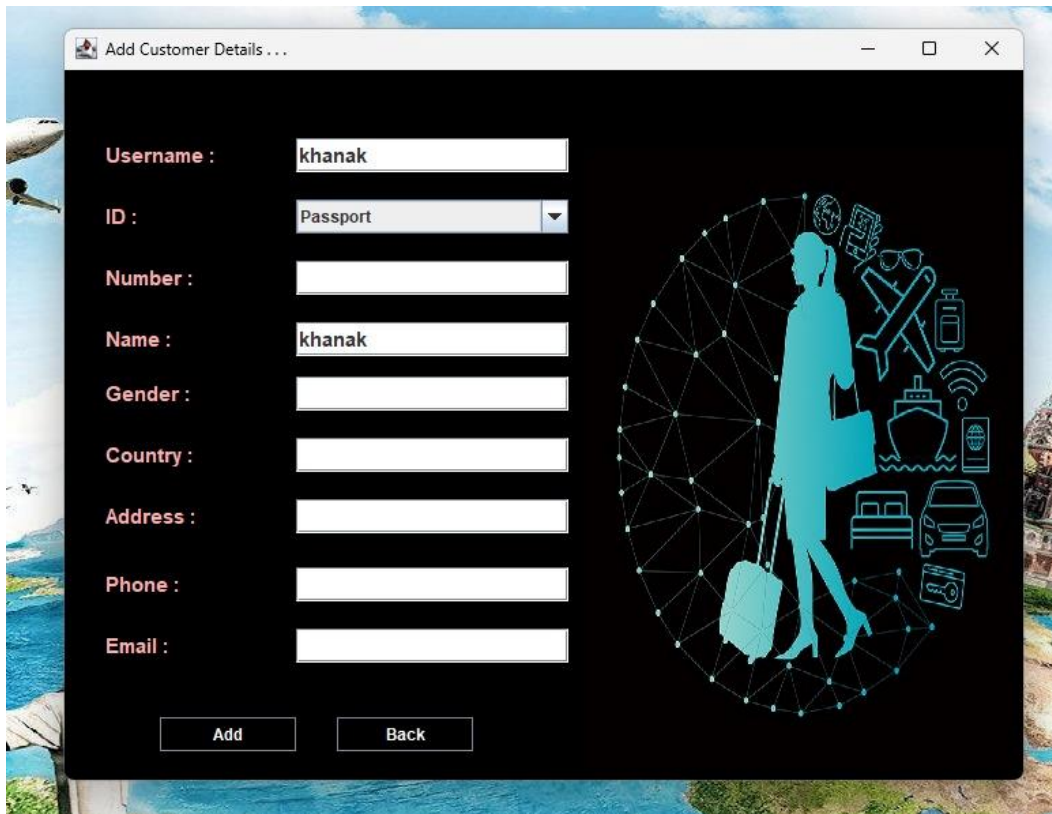

- Add Personal Details
- Update Personal Details
- View Details
- Delete Personal Details
- Book Package
- View package
- Book Hotel
- View Book Hotel
- Payment
- Logout

Main Content Area:

- Title:** "Tourism Management System - By Ankita_Vaishnavi_Khanak_Kishan" (in a black box).
- Image:** A large, colorful illustration of a world map with various landmarks and travel elements. Landmarks include the Statue of Liberty, Christ the Redeemer, the Eiffel Tower, Big Ben, the Leaning Tower of Pisa, St. Basil's Cathedral, and the Taj Mahal. Travel elements include two airplanes, a helicopter, a boat, and a train.

Footer: A small text label at the bottom left corner reads "© 2024 OOADJ Project".
